Trade Waste Metering Code of Practice

WSA 15—2014

First Edition

Version 1.1

CONTENTS

PREFACE

1 SCOPE

1.1 PURPOSE

1.2 OBJECTIVES

1.3 REGULATORY CONTEXT

1.4 APPLICATION OF THE TRADE WASTE METERING CODE OF PRACTICE

1.5 INTRODUCTION AND FUTURE REVIEW OF THE CODE

1.6 TRADE WASTE METERING AND NATIONAL MEASUREMENT LEGISLATION

1.6.1 National Measurement Legislation

1.6.2 Pattern approval of trade waste meters

1.6.3 Verification of trade waste meters

1.7 RELATED DOCUMENTS, CODES AND LEGISLATION

2 PLANNING

2.1 GENERAL

2.2 PLANNING POLICY

2.3 PLANNING CRITERIA FOR METERING REQUIREMENTS OF TRADE WASTE

2.3.1 Flow rate ≥ 10 kL/day

2.3.2 Chargeable trade waste loads

2.3.3 Supporting trade waste risk estimation and management

2.3.4 Allowable rates of discharge

2.3.5 The discharge cannot be calculated using consumption data

2.3.6 Exception – the use of other methods of establishing flow volumes

2.3.7 Exception – the volume ≥ 10 kL/d, but a trade waste meter is not justified

2.3.8 Exception – criteria for use of a process sub-meter

2.4 PLANNING CONFIGURATION

2.4.1 General

2.4.2 An approved trade waste meter

2.4.3 A sub-meter on the process water incoming line

2.4.4 A percentage of the mains incoming water meter

3 DESIGN

3.1 DESIGN REQUIREMENTS

3.2 DESIGNER'S RESPONSIBILITIES

3.3 DESIGN APPROVAL

3.4 METER DESIGN AND SELECTION

3.4.1 Type

3.4.2 Meter size

3.4.3 Materials

3.4.4 IP rating

3.4.5 Maximum permissible error

3.4.6 Power failure

3.4.7 Display

3.4.8 Output requirements

3.4.9 Meter operation

3.4.10 Flow direction

3.4.11 Serial number

3.4.12 Security

3.5 OTHER DESIGN REQUIREMENTS

3.5.1 Flow rate

3.5.2 Flow disturbance

3.5.3 Meter installation

3.5.4 Electrical isolation

3.5.5 Electrical continuity

3.5.6 Electromagnetic interference

4 SELECTION

4.1 GENERAL

4.2 CRITERIA

4.3 MANUFACTURER'S GUIDES AND MANUALS

5 INSTALLATION

5.1 DOCUMENTATION

5.2 OTHER SPECIFIC REQUIREMENTS

5.2.1 Training and accreditation of personnel

5.2.2 Design Drawings and Specification

6 COMMISSIONING

7 MAINTENANCE

7.1 GENERAL

7.2 POLICY

7.3 REPLACEMENT SCHEDULE

7.4 SUBSEQUENT VERIFICATION

7.4.1 General

7.4.2 For meters of a size not exempt from the Act

7.4.3 For meters of a size exempt from the Act

7.5 ELECTRONIC CALIBRATION

7.6 TRADE WASTE METER COMPLIANCE FAILURE

8 METER REPLACEMENT AND DISPOSAL

8.1 GENERAL

8.2 REPLACEMENT OF METER

8.3 METER DISPOSAL

9 METER READING

9.1 GENERAL

9.2 RESPONSIBILITY

9.3 ACCESS TO SITE

9.4 ACCESS TO DATA

9.4.1 General

9.4.2 Reading frequency

9.5 AMR AND AMI CONSIDERATIONS

9.6 AUDITING

10 WORK HEALTH AND SAFETY

10.1 GENERAL

10.2 STRAY ELECTRICAL CURRENT AND EARTH LEAKAGE

10.3 MANUAL HANDLING

10.4 CONFINED SPACE ENTRY

11 REFERENCED DOCUMENTS

12 DEFINITIONS

13 ABBREVIATIONS
